And I think that all of us want to watch dollars, but I think it's absolutely our best posture to take the lead and take it now. We won't lose track of where these first seed dollars came from, and when the time comes to get others on board, we will be in the lead and we will have a more formal way of measuring MR. ROSE: Good point. MR. TAYLOR: contribution versus value. So, I think it's a very good good thing you've done. MR. WUELLNER: Thank you. CHAIRMAN DAVIS: Thank you, Mr. Taylor. The Board of County Commissioners I thought made it pretty clear at that meeting that they didn't want they didn't want to take the project and do it themselves, that they felt like it was an area that they're not equipped and qualified to really get into, which was these types of facilities. They, on the other hand, felt that it was right up the Airport Authority's alley. This is kind of what we do in terms of public terminal-type facilities, and we'd probably be the appropriate agency and they would support whatever it took to get us there. Now, you know, whether that is going to translate into money, you know, I think the whole thing as it goes through the next six months there's going to be some very interesting discussions on both where the money's coming from and who's willing to make the commitments to the project. CHAIRMAN DAVIS: Thank you. Any other
